Gin Rummy has become the most popular two handed card game of the century. It is the most favorite of all household games the world over, from the entrepreneur to the student.

Karateco's GIN RUMMY is a technological breakthrough, and the player has to beat the incorporated computer in order to win a free game.

Karateco's GIN RUMMY is played with a full 52 card deck. The player is dealt 12 cards, and so is the computer. The object of the play is to form matched sets consisting of three or four of a kind, or of sequences of three or more cards of consecutive rank, not necessarily in the same suit.

As the «Gin Rummy» card game, the player and the computer can each chose to draw a card, pick up one or discard one.

Either the player or the computer wins first, with a 13th card.

Karateco's GIN RUMMY is probably the highest income amusement machine on the market today.
